We Realize The New

# Idea to Impact

How Inertia Helps Medical Device Startups Build Scalable Health Hardware

July 28, 2025

# A bit about me ...

**Manager, Partnerships**

**Connector Across Ecosystems**

**Big Picture Thinker, Detail-Obsessed Planner**

# Agenda

**Introducing Inertia**

**Current Top Trends in the Medtech Sector**

**Common Pitfalls for Medtech Startups**

**What Successful Scale-ups Do Right**

**Getting the Most from Inertia**

**Working Together Through CAMEDA**

**How the Ecosystem Can Help**

**Q&A**

**21** **Years.**  
Since 2004

**Toronto.**  
**Boston.**  
**Guangzhou.**

"I have an idea ..."

"Can you build a  
prototype ..."

"Can you manufacture  
this ..."

# Endless Market Success

**Proven Demand**

"Will people want this product badly enough to switch from what they are using now?"

**Launch Certainty**

"How do we know we have the best team & methods to successfully launch our product?"

**Effortless Scaling**

"How are we building long-term profitability into our product and business, starting now?"

# Our Mission

---

Delight Customers.  
Launch Products.  
Scale Businesses.

# Our Services

## 1 Product Strategy

- Market Research
- Competitive Benchmarking
- Product Positioning
- System Architecture Design
- Human Factors Engineering
- Business Modeling
- Regulatory Strategy
- Go-To-Market Strategy
- Manufacturing Strategy

## 2 Product Development

- Industrial Design
- Physical & Digital UI/UX
- Risk Analysis & V&V Planning
- Mechanical Design & Eng
- Electronics Design & Eng
- Firmware & Software
- Engineering Prototypes
- Verification & Validation Testing
- Design for Manufacture & Assembly

## 3 Product Manufacturing

- Global Sourcing
- Quality Planning (IQ,OQ,PQ)
- Assembly Line Design
- Manufacturing Management
- Complete Product Assembly
- Supply-Chain Management
- Tracking & Traceability

# Award Winning Designs

# Our Health Science Clients

# Medical & Diagnostic Portfolio

# How We're Different

**One Team.  
Zero Silos.**

**Built for Outcomes.  
Not Overhead.**

**82**

**Exceptional  
to Work With**

# Why Work With Us?

**Navigate Complexity  
With Confidence**

**Accelerate Time to  
Market & Save Burn**

**Walk Away Smarter**

# Current Top Trends in Medtech

Increased focus on digital health + connected devices

Regulatory bar keeps rising

Usability and patient-centred design now weigh as heavily as technical specs

Payers now demand clear reimbursement codes and economic evidence

Investors have moved from idea-first “moonshots” to backing teams with traction

# Common Pitfalls for Medtech Startups

Working in silos and strictly on sequence

Skipping user & clinical journey mapping

Treating assumptions as facts

Wrong decision on when to stay in-house — and when to outsource.

Not doing a true cost-benefit analysis for each decision

Skipping regular investor updates — leaving current and future potential backers in the dark.

Treating fundraising as episodic

**Simple, proven methods exist to tackle every one of these pitfalls — too many founders just haven't been shown why they matter or how to use them.**

# Successful Scale-ups

Define a clear regulatory path early

Stay focused on a sharp, testable MVP

Build a real plan to profitability — launch alone isn't enough

Communicate consistently

“Always Be Fundraising”— no last-minute scrambles when runway gets tight

# What Companies Should Have Before Engaging Us

A well-defined user or patient need — supported by direct evidence, not just personal experience.

Why is your solution needed now by the market? Who are these markets?

A thorough and honest understanding of competitive landscape

Started engaging friends and family, angel investors, or other early backers?

# Working Together Through CAMEDA

Non-dilutive FedDev funding for medtech commercialization

Accelerate development, reduce costs, and engage expert service providers in a lower-risk setting

Determine the value of that acceleration — what does it save you in burn, in team focus, in opportunity lost?

x

**inertia**<sup>•</sup>

# Our CAMEDA Partners

# Sample Diagnostic - From Lab to Product

8 months

# How the Ecosystem Can Help

Curated “match-making” days where accelerators line up short 1-to-1 meetings with development partners like us

Quarterly demo showcases built around specific clinical themes

Micro-grant programs that fund an initial DFM or usability sprint led by CDMOs like Inertia to de-risk early prototypes

Talk to companies like us – we're happy to share our PoV!
