

An aerial night photograph of a large, modern, multi-story building with a complex, angular design. The building is illuminated with warm interior lights, and some windows show bright yellow light. The surrounding area includes a street with traffic lights, some trees, and other smaller structures. The overall scene is a cityscape at night.

TECHNOLOGY & THE FUTURE OF HEALTH CARE 2019

Co- Chaired by Dr. Richard Tytus & Dr. Dennis DiValentino

Key Health Concerns

-
- Underfunded system/inefficient resource use
 - Aging population-double whammy
 - Patient expectations-Health care is not GEICO!
 - Lack of integration/proper communication
 - Provider “burnout”

Everything is
Connected...

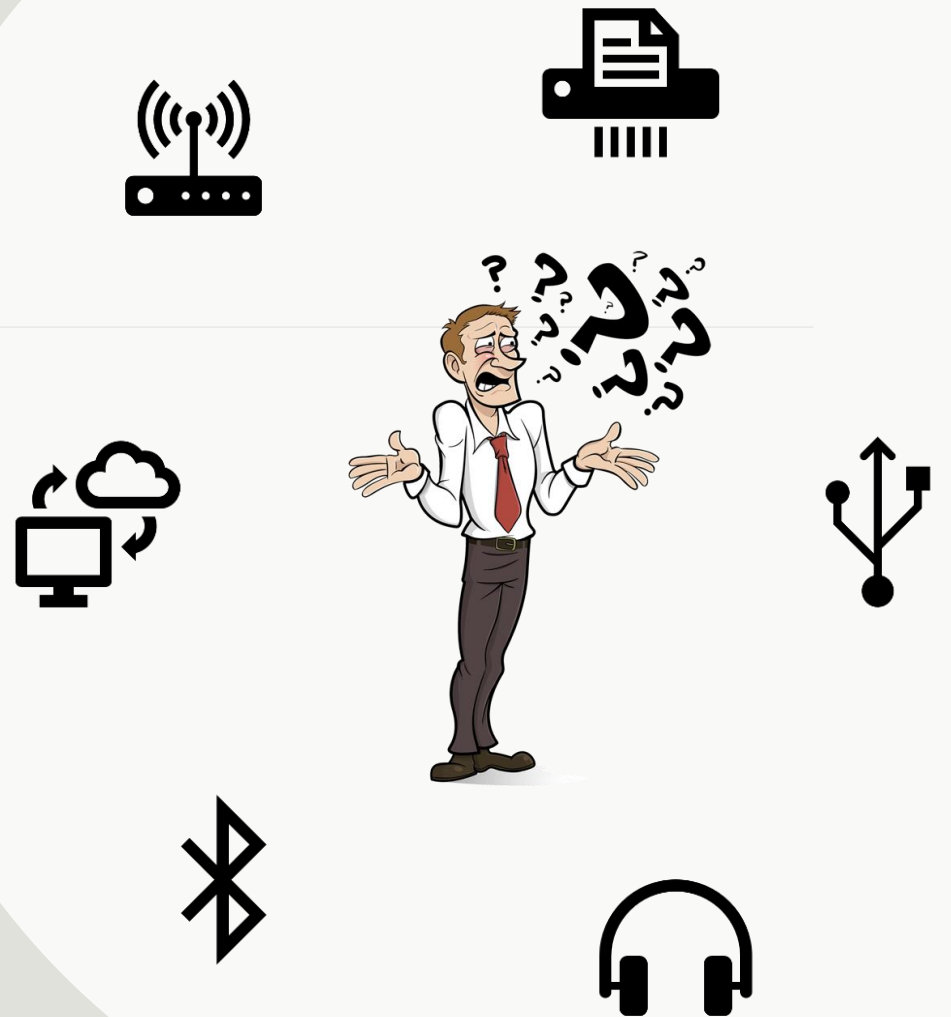

Technology can
solve many
problems...

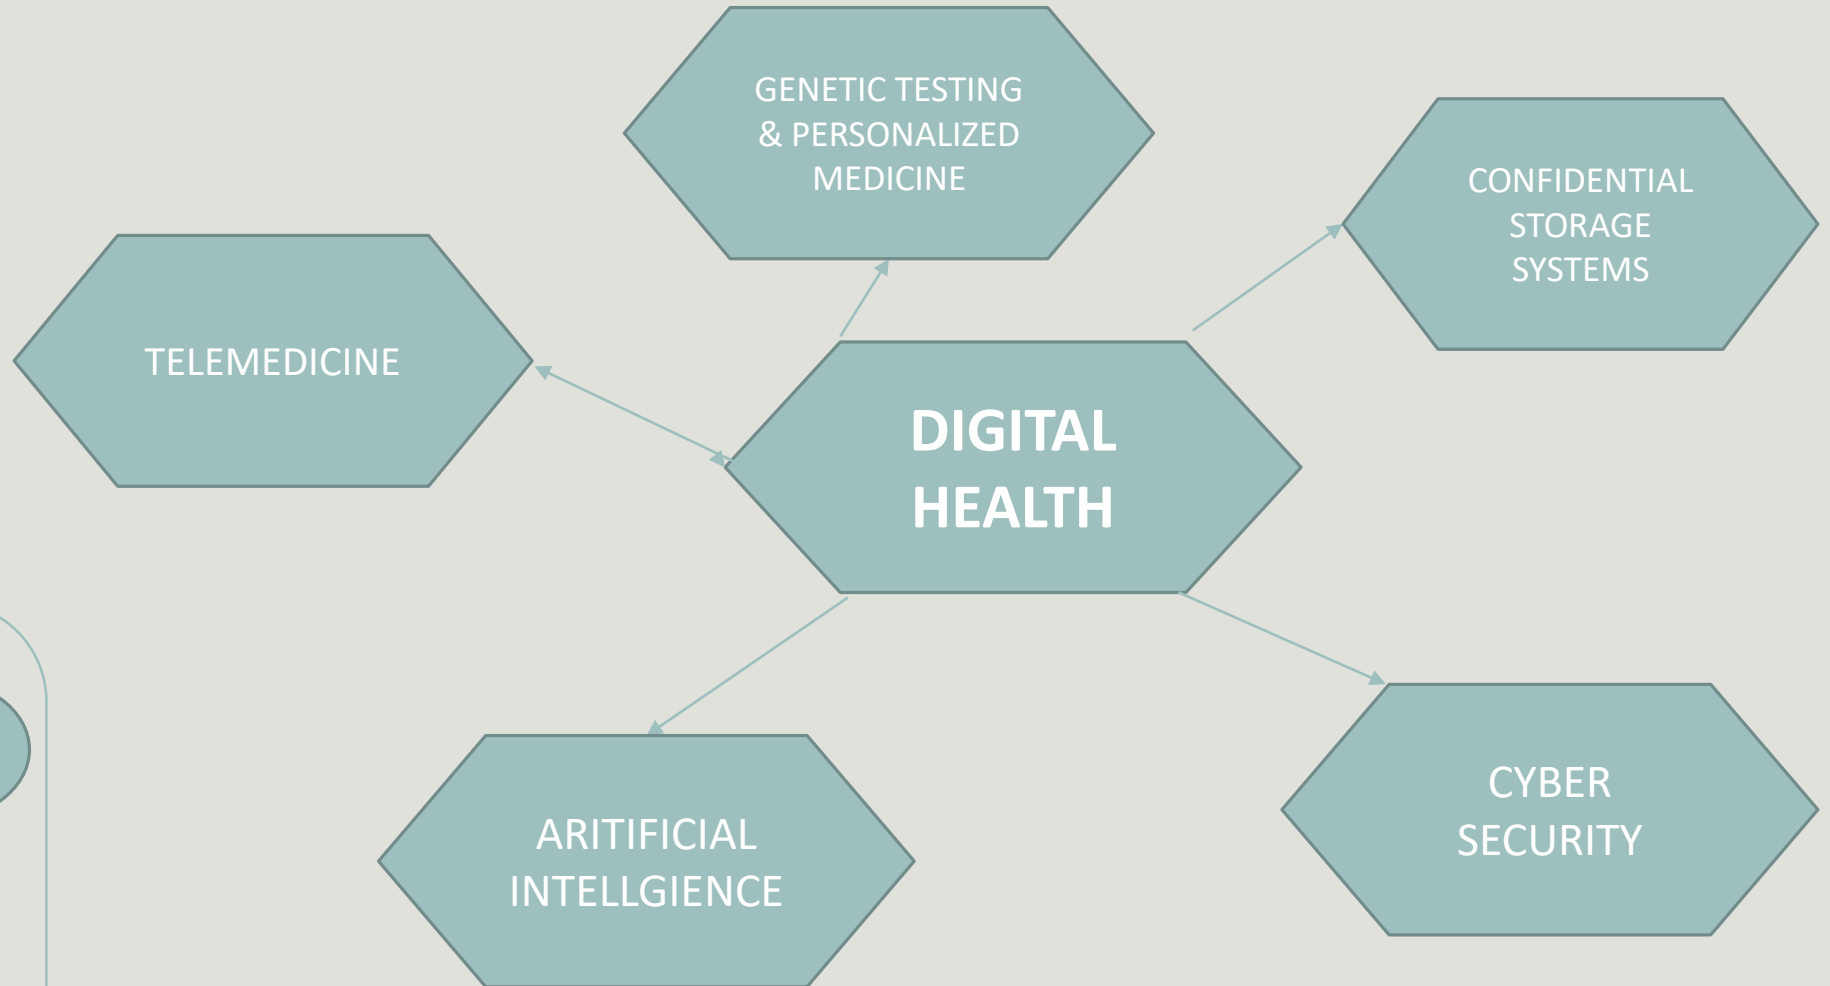

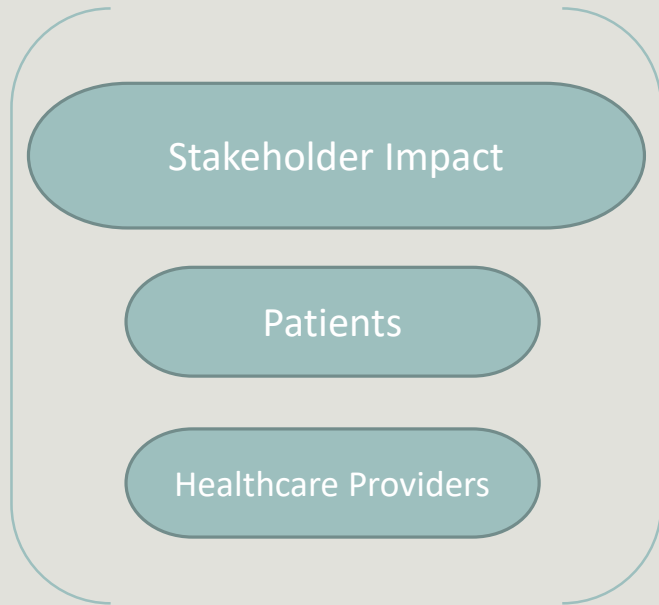

What Is Digital Health?

If It Ain't Analog, It Must Be
Digital!!!

DIGITAL HEALTH DEFINED....

Barriers to Technological Progress

PHIPA vs. HIPAA

Barriers to Technological Progress

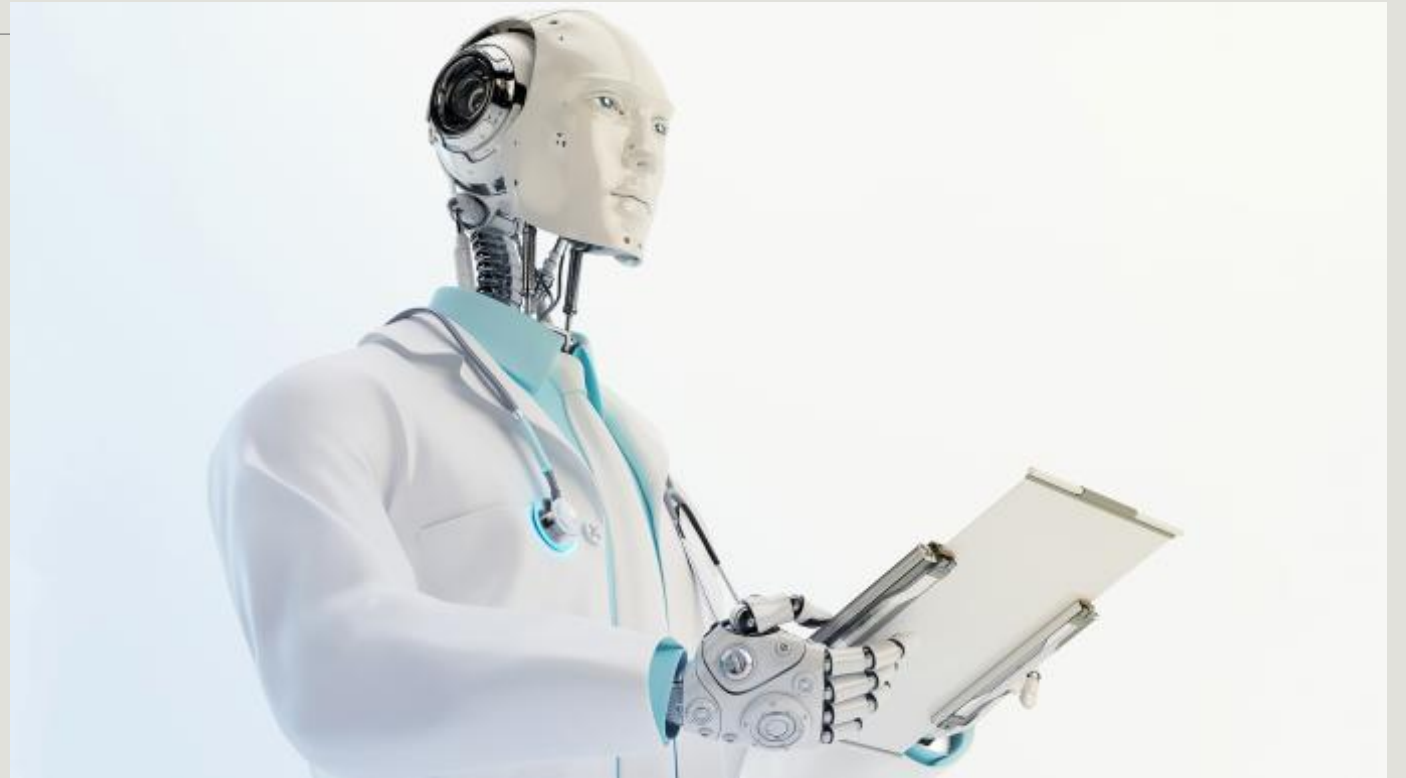

Many technologies do not address
the real problem....

Barriers to Technological Progress

On the provider
side...

- Lack of Understanding
- Fear
- Lack of
Funding/Resources
- Lack of Engagement

Barriers to Technological Progress

On The Patient Side...

- Lack of understanding/
inability
- Resistant to change

Barriers to Technological Progress

On the patient
side.....

How much information is
too much information?

Barriers to Technological Progress

Good enough is not good
enough

Regulatory barriers

Barriers to Technological Progress

On the system
side...

Lack of integration
Funding!!!

The Path Forward
